The GranView

High Efficiency Zero Clearance Fireplace

Ancient Iron Door and Lower Louver
With a 33” W x 17 ½” H opening, the GranView has the largest fire view of any wood burning fireplace in its class. This window of flame provides a beautiful focal point for any room, without any unsightly internal obstructions.

**95.4% Combustion Efficient Design**

While you’re relaxing in the warmth of the fire, the GranView is hard at work burning the smoke that is wasted by normal fireplace designs. This clean-burning fireplace limits hydrocarbon emissions, reducing creosote accumulation in the chimney.

**Flexible Design Options**

The elegant style of our arched or rectangular doors can be enhanced with optional nickel plating or Ancient Iron to create a fireplace design with unlimited decorating options. Choose the look you desire by finishing your installation with stone, tile, stucco or any manufactured facing material to create the fireplace of your dreams.

**Unique Air Supply System**

The GranView incorporates a unique combustion air supply system that directs outside air to every supply port inside the fire chamber. By directly connecting the combustion air from outside the home to the unit, heated room air is not lost up the chimney when you are burning a fire. “Fireplace odor” or cold drafts will never invade your home when the fireplace is not in use.

A specially designed air wash provides ample flow of incoming air to continually sweep the glass clean and create a dramatic flame pattern.

**Zero Clearance Installation**

Our zero clearance surround provides easy, cost effective installation. A special foundation or support is not required to install the fireplace.
