*High Efficiency, Heat Circulating Fireplace*

Ancient Iron Door

**WILKENING**  
*Fireplace*

Prairie Door

*The GranView is in a class by itself, being the only UL listed, masonry installed, high efficiency, heat circulating fireplace. The window of flame provides a beautiful focal point for any room, without any unsightly internal obstructions. The masonry design stores heat from the fire, warming your home long after the fire has burnt out.*

## DOOR OPTIONS

## UNIQUE AIR SUPPLY SYSTEM

The GranView incorporates a unique, self-regulating, combustion air supply that directs outside air to every supply port inside the fire chamber. By directing combustion air from outside to the fireplace, heated room air is not lost up the chimney when you are burning a fire. “Fireplace odor” or cold drafts will never invade your home when the fireplace is not in use.

A specially designed air wash provides ample flow of incoming air for clear viewing of the fire. Natural convection moves the heated air through your home at over 300 cubic feet per minute.

## 95.4% COMBUSTION EFFICIENT DESIGN

While you’re relaxing in the warmth of the fire, the GranView is hard at work burning the smoke that is wasted by normal fireplace designs. This clean-burning fireplace limits hydrocarbon emissions, reducing creosote accumulation in the chimney.
